EMTEC TRUST S510

Ultra High Speed USB 2.0

Securely store corporate information

> Personal storage devices, more powerful than ever, have become ubiquitous in the enterprise environment. Typically lacking security, control and auxiliary management tools, securing data on these devices has become a significant challenge for any corporation.
mDrive Corporate, the first USB flash drive designed for corporate use, transfers control over personal storage from the individual to the organization.
The robust, enforceable security features – including hardware encryption and tamper-proof software – minimize the risk of compromised data and ensure the integrity of all stored information.
mDrive Corporate's unique hardware and software allow the devices to be centrally managed and controlled through mTrust software, delivering a complete enterprise-grade solution for mobilizing data.

> enterprise security. made smarterTM.
mDrive Corporate secures the integrity of mobile corporate data – without hampering the productivity enabled by personal storage devices.
mDrive Corporate empowers organizations with control over personal storage devices.
• Protects information on lost or stolen devices
• Aids in compliance with regulations such as Sarbanes-Oxley and HIPAA, requiring secure storage of sensitive information
> Secure storage :
• 256-bit hardware-based AES encryption
• Configurable complex password
• Lockdown mode when incorrect password attempts exceed a preconfigured value

> Enforceable security :
• All security decisions are made by the organization
• No "public zone" to jeopardize files
• Tamper-proof software cannot be removed or modified
Central management and control*
• Combined with msystems' mTrust Manager, mDrive Corporate can be centrally deployed, provisioned, tracked and audited
• Integration with msystems' mTrust Shield for controlling the use of all removable devices and media, ensures that employees store information only on companyapproved devices
When used with mTrust Software
> Specifications :
• Up to 24Mb/s
• Density: 1Gb to 8 GB
• Interface : USB 2.0 High Speed
System requirements :
• Windows 2000 (SP2 or higher), Vista & ReadyBoost Windows XP / Windows 2003 Server
• No pre-installed software required
